	Examiner Kenneth B Rinehart	Art Unit 3749	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Response to Amendment***

The applicant has made amendments to the drawings, however, the amended drawings do not overcome the objections. The drawings do not show closing said coolant channel and said air channel, enabling said coolant to flow through said coolant channel, enabling the compressed air stream to flow through said air channel, movement of said primary valve between said first and second and third configurations, air delivering means cooperating with said trigger for delivering a compressed air stream through said air channel to said second outlet port when said trigger is at said second configuration; and actuating means cooperating with said trigger for actuating said canister to deliver a portion of said coolant through said coolant channel to said first outlet port when said trigger is at said third configuration. Specifically, the drawings that have been amended show the trigger in three different configurations but do not show, the movement of any of the internal portions of the mechanism when the trigger is moved from one position to another.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the and a primary valve positioned in said body portion of said housing in communication with said coolant and air channels and selectively movable between a first configuration closing said coolant channel and said air channel, a second configuration enabling said coolant to flow through said coolant channel, and a third configuration enabling the compressed air stream to flow through said air channel, a trigger coupled to said primary valve for user movement of said primary valve between said first and

Art Unit: 3749

second and third configurations, a trigger mounted in said housing and extending therefrom for movement between first, second, and third configurations; air delivering means cooperating with said trigger for delivering a compressed air stream through said air channel to said second outlet port when said trigger is at said second configuration; and actuating means cooperating with said trigger for actuating said canister to deliver a portion of said coolant through said coolant channel to said first outlet port when said trigger is at said third configuration, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-12, and 15-20 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B Rinehart whose telephone number is 571-272-4881. The examiner can normally be reached on 7:20 -4:20.
